

Nil Biescas

Webpage: <https://nilbiescas.github.io/>

Lausanne, Switzerland

Email: nilbiescas3@gmail.com

Personal Profile

First-year **Master's** student in **Data Science** at **EPFL**. Graduated in the **top three** of the first Artificial Intelligence cohort in Spain. Nearly **two years of research experience** at one of the country's leading AI centers, with publications at international conferences including ECCV and ICDAR. Fluent in English, Catalan, and Spanish, and deeply motivated to advance AI research and real-world applications.

Education

M.Sc. Data Science, EPFL, Lausanne, Switzerland September 2025 – Present

BSc Thesis, Computer Science, TUM, Munich, Germany April 2025 – August 2025
BSc Thesis: AnyCam-3D: Extending AnyCam for Dense 3D Geometry Reconstruction in dynamic, uncalibrated videos; In the Computer Vision Group under the supervision of Prof. Dr. Daniel Cremers

Summer School in Robotics, Control Systems and AI July 3–5, 2024
Intensive program focused on robotics, control, and artificial intelligence

B.Sc in Artificial Intelligence, UAB, Barcelona, Spain September 2021 – August 2025
GPA: Overall 9.2/10; Top 3%

Experience

Research Intern, Visual Intelligence and Learning Lab, Lausanne February 2026 · June 2026
Developing vision tokenizers for 3D understanding with robotics applications, advised by Professor Amir Zamir.

Student Research Intern, Computer Vision Center, Barcelona, Spain July 2023 · March 2025
Conducted applied AI research in computer vision, contributing to publications at ECCV 2024 and ICDAR 2024, 2025.

- **Generative AI**: Enhanced the understanding of LLMs in structured documents by modifying the attention mechanism.
- **Graph Neural Networks (GNN)**: Work with Graph Neural Networks with contrastive learning for document data mining.

AI Consultant, IDISC Information Technology, Remote November 2024 · April 2025
Developed an AI pipeline to automate document digitization from images using OCR, Llama, and computer vision techniques.

Publications

Nil Biescas, Sanket Biswas, Josep Lladós, Jordy Van Landeghem. *Where Layout Meets Language: Lightweight Spatial Enhancement to Large Language Models for Document Understanding* International Conference on Document Analysis and Recognition (Poster Presentation ICDAR 25).

Nil Biescas, Carlos Boned, Josep Lladós, Sanket Biswas. *GeoContrastNet: Contrastive Key-Value Edge Learning for Language-Agnostic Document Understanding* International Conference on Document Analysis and Recognition (Oral Presentation ICDAR 24).

Nil Biescas, Maria Pilligua, Javier Vazquez-Corral, Josep Lladós, Ernest Valveny, Sanket Biswas *LayeredDoc: Domain Adaptive Document Restoration with a Layer Separation Approach* ECCV WICV workshop 2024 — ICDAR ADAPDA workshop 2024 [WebPage Demo](#)

Awards and Achievements

Two Research Scholarships, awarded: 2023 CVC Internship Award – 2,000€
Honours in 12 subjects, including Computer Vision, NLP and Autonomous Agents.
Developed a bilateral teleoperation system with haptic feedback for the Franka Emika robot

**Highlighted
Projects**

Semester project at TUM, developed a bilateral teleoperation system with haptic feedback for a Franka Emika robot paired with a haptic device. Implemented ROS-based communication between the haptic device and the robot using C++.

Skills

Languages

- English (C1 – Advanced)
- Spanish (Native)
- Catalan (Native)

Technical Skills

- **Programming:** Python, C++
- **Libraries:** PyTorch, timm, Diffusers, ROS
- **Tools:** Rerun-io, Linux, Slurm, Docker
